

Circuit-X Competition

(By RoboForge)

Description : Circuit-X is an exciting and intellectually challenging circuit design competition that brings together innovative minds to demonstrate their expertise in electrical and electronic systems. The event features two rigorous rounds designed to evaluate both theoretical understanding and hands-on practical skills. Participants compete individually, applying core concepts of network analysis, analog electronics, and digital circuits to solve complex problems and create efficient, functional designs. Circuit-X tests not only technical knowledge but also creativity, precision, and real-world problem-solving ability.

Rules & Regulations:

- 1) The competition consists of **II rounds**: A written round and a Circuit based round.
- 2) The **First round** is a pen-and-paper test with questions on basic network analysis, analog circuits, and digital circuits.
- 3) The **Second round** requires participants to play with the circuits (can be on paper , Simulation or real circuits) .
- 4) Participants must bring their **own pens**.
- 5) Preference will be given to Marks and then time .
- 6) In case of a tie, additional miscellaneous round is there.
- 7) Any form of **malpractice or violation of rules** will result in immediate disqualification.

Note: Any changes in rules will depend on the judges and organizers.
